

# PROJECT

- Self-chosen project for a mobile application
- Use a Git repository to manage your project. Create a public repository and share the link via email or create a private repository and add "jorisdieltiens" as a collaborator
- Deadline for the project is 18 December 2022, Enroll for an individual defense on 19 or 20 December on Canvas
  - Use .NET MAUI for a mobile application (Android and/or iOS)
  - Use the MVVM design pattern (MAUI data binding)
  - Your application should have at least 2 pages with navigation
  - Add at least 2 Unit tests to your project
  - Communicate with an ASP.NET web application (API) (E.g. load and save app data)
  - The ASP.NET API must run in a Docker Container
  - The ASP.NET API must store data in a MySQL database
